

CLAIMS

That which is claimed is:

1. A channel type frame adapter which allows or facilitates the installation of a pane, panel, multiple paned or multiple paneled unit into a frame which was made to accommodate a pane, panel, multiple paned or multiple paneled unit of the same or another thickness or size.
2. An adapter in accordance with claim 1 wherein, it is designed to encase the perimeter or edge of a pane, panel, multiple paned or multiple paneled unit and which is designed to be inserted into a frame.
3. An adapter in accordance with claim 1 wherein, it is made of a rigid material.
4. An adapter in accordance with claim 1 wherein, it is made of a flexible material.
5. An adapter in accordance with claim 1 wherein, it is made with a part which is manufactured of a material which is suitable for the purpose of sealing, protecting or cushioning the material which is to be inserted into the adapter.
6. An adapter in accordance with claim 1 wherein, it is made to be used in conjunction with a separate seal available for that purpose.
7. An adapter in accordance with claim 1 wherein, the height, width, depth, thickness or length of any dimension or part may vary in order to accommodate the desired application.
8. An adapter in accordance with claim 1 wherein, the parts of the adapter form 90 degree angles.

9. An adapter in accordance with claim 1 wherein, the parts of the adapter form angles which are greater or less than 90 degrees.
10. An adapter in accordance with claim 1 wherein, parts of the adapter are formed with angles, bends or curves.
11. An adapter in accordance with claim 1 wherein, parts of the adapter are formed in such a manner as to create a catch when inserted into a frame.
12. An adapter in accordance with claim 1 wherein, it is made as a single or multiple piece adapter.
13. An adapter in accordance with claim 1 wherein, a part or parts of the adapter are adjustable.
